PREFACE

These pages contain revisions made to the 1991 Standard Housing Code during the 1991 code change cycle. They were processed through two public hearings and ratified by a final ballot of the active membership of the Southern Building Code Congress after the 1991 Annual Conference. The revisions are presented as page replacements in the 1991 Standard Codes™.

The purpose of this code is to provide the basic minimum housing standards deemed essential for safe and healthful living. The code provides the minimum requirements necessary to maintain any residential occupancy in a safe and sanitary condition.

The Standard Housing Code is one of the ten codes published and maintained by the Southern Building Code Congress International and is a minimum housing code relating principally to the use, occupancy and maintenance of existing residential buildings and shall not be construed as being a building construction code.

The Standard Housing Code contains certain terminologies or references, such as "properly installed," "properly connected," "properly constructed" and other similar terms. It is intended that these references relate to the Standard Building, Plumbing, Gas, Mechanical and other codes published by the Southern Building Code Congress International or any other codes officially adopted and administered by the governing body of this code.

Vertical bars in the margin indicate changes made since the 1988 edition.

Stars in the margin indicate deletions from the 1988 edition.
